

OVER THE COUNTER DRUGS AND ITEMS GUIDE (OTC)

Over the Counter Drugs and Items Guide 2020

What are Over the Counter (OTC) drugs and Items?

OTC drugs are non-prescription drugs that are not normally covered by the Medicare Part D prescription drug benefit. OTC drugs are used for the treatment of medical symptoms such as cough, cold, pain, diarrhea and upset stomach, among others.

When can I begin to use my OTC drugs and Items benefit and what does it include?

You can begin to use your OTC benefit, once your enrollment is effective with the plan. This guide includes OTC drugs and items for the health and wellness over the counter. It contains a list of some common-use drugs, **but it does not include** all drugs and brands covered by the plan.

Do OTC drugs and items covered by the plan have any cost?

Triple-S Advantage will provide coverage for these **OTC drugs and items at no cost to you**. These drugs are covered under the Part C. The cost of these OTC drugs will not count toward your total prescription drugs costs of the Part D drugs.

What are the rules for getting OTC drugs and items?

You will be able to obtain OTC drugs and items without a medical order. The following rules apply for getting OTC drugs and items:

1. Triple-S Advantage will cover up to a maximum dollar amount for OTC drugs and items every three months. After the maximum dollar amount is reached, Triple-S Advantage will not cover these drugs until the following three months, when the maximum quarterly coverage starts again. The quarters are according to calendar year, for example: January-March, April-June, July-September and October-December, with a total of four quarters per year. The amounts must be used in full as they do not accumulate from quarter to quarter. Each plan offers different OTC maximum dollar amounts. Check your Evidence of Coverage for the specific amount of your plan.

2. OTC drugs must be obtained through the Triple-S Advantage network, and they may only be purchased and used by the enrollee.
3. The categories of OTC drugs and items must be included in this guide, to be covered. The availability of brands and costs may vary depending on the network pharmacy you visit.

What are the advantages of using OTC drugs?

The use of OTC drugs allows the patient to have greater access to a variety of drugs-available in the market for the treatment of some medical symptoms. In addition, it helps the patient save money, because they usually cost less than other drugs.

You may use OTC drugs to treat some medical symptoms. Consult your physician or pharmacist, and remember to always read the package labeling for specific instructions on how to take them, as well as any warnings or precautions you should consider when taking them.

How do I use this OTC Drugs and Items Guide?

This guide classifies OTC drugs and items by category, according to the most common symptoms they are used for. For example, drugs to treat cough and congestion are classified under the category Cough / Cold / Allergies. If you know what your OTC drug is used for, look for the category name in the Table of Contents. Then look for your OTC drug under that category. You can also look for the name of some OTC drugs examples in the alphabetical Index at the end of this document.

Where I should contact in case of doubts and questions?

This guide is effective from January 1, 2020 through December 31, 2020. For more information, contact Member Services at **1-888-620-1919** toll free, TTY users should call **1-866-620-2520**, Monday to Sunday from 8:00 a.m. to 8:00 p.m. or visit our website www.sssadvantage.com.
